Working Prototype Known Problems Report

SKEDD
Team Nimbus
Release Date: 11/23/2016

1. When editing a shift, if you change the position the color will not update to the correct position shift color.
2. Creating multiple shifts doesn't work on heroku or locally when we changed the function to convert it to json we left out the datetime and endtime objects this throws an error and we didn't have time to fix it.
3. Heroku is sometimes very slow. Sometimes after hitting submit it takes awhile for heroku to respond.
4. Otherwise everything locally should work. Heroku will work half the time, it throws internal server errors, and sometimes sendgrid wont send emails correctly.
